					<b>TOTAL 7/</b>	<b>16.5000</b>
<b>Notes:</b>						
1.) DWR Tract # 75 has a first priority water right of 0.08 cfs, and is not subject to rotation, (parg. 4). The water is to come first from the spring near the head of Royce Ditch, with deficiency made up by direct diversion from Pine Creek.						
2.) Rotation starts at 8 a.m. March 20, and continues until flow recedes to 4.0 cfs at which time all water is turned into the North Channel for Tracts 68 and 70.						
3.) When creek recedes to 1.60 cfs all water is turned into Cressler Ditch for Tract 76-2. When creek further recedes to 0.30 cfs, all water goes to Tract 74.						
4.) If flow is over 17.5 cfs, then next 1.65 cfs goes to Tract 70. If flow is over 19.15 cfs, then excess flow is divided between Tracts 72 and 73.						
5.) Flow to be measured at the division of the North, and South Channels. Allow two, (2) cfs for channel loss.						
6.) After completion of second rotation, repeat second rotation schedule until flow recedes to 4.0 cfs., (footnote #2).						
7.) Watermaster billing based on continuous flow equivalents shown in Schedule 3 of decree.
